MANITOULIN-SADBURY DISTRICT SERVICES BOARD

JUNE, 2008

Conseil des Services du District de
Manitoulin-Sudbury
District Services Board

DEMOGRAPHIC CHARTBOOK – HIGHLIGHTS

It is well documented that Canada's population is aging. This is evident in the Districts of Sudbury and Manitoulin: the catchment area for the Manitoulin-Sudbury District Services Board. Key components of the population aging phenomenon include:

- A net decrease and relative decline in the 0 to 4, 5 to 14 and 15 to 24 age groups
- A large increase and proportionate increase in the 55 to 64, 65 to 74 and 75 years of age and over age groupings
- Limited in-migration, primarily in the retirement age groups, along with out-migration in the younger age groups

Implications of this aging-in-place phenomenon may be manifested in the following ways that have repercussions for the Manitoulin-Sudbury District Services Board:

- Fewer young children in the area may have an impact on the demand for Child Care/Day Care spaces
- Fewer young and working aged adults (eg. aged 15 to 54 years) can mean more of a tax burden on older adults who may be on fixed incomes
- An aging population may have implications on social housing as persons on fixed incomes may have increasing difficulty maintaining and living in their own homes
- An aging population may have implications on Emergency Medical Services as the need for medical services tends to increase with age
